Customer Reviews

Very disappointed with the book. The main attraction for me buying the book was the evaluation CD it is accompanied with. Unfortunately, one has to procure the license key from IONA Technologies for the ORBIX intallation. I have sent several emails to IONA regarding this but have not heard anything for days. What a waste of my money!

This book only helps if you use IONA's COMet to bridge. It tells you nothing useful about the two technologies, and like IONA, is way behind on the CORBA specs.
